

**Our Predictive Maintenance Programs are geared to your individual needs, taking into consideration:**

- Process, product & equipment type
- Downtime history & maintenance expenditures
- Maintenance budget restrictions

CSI 2120A data collector

**Each program we administrate will:**

- Minimize or eliminate unscheduled downtime
- Minimize or eliminate catastrophic machinery failure
- Increase plant safety
- Reduce insurance costs not only through potentially decreased rates but also as a result of fewer loss claims

The detailed reports generated from data collection routes show you the problem areas and allow you to schedule necessary repair work as needed.

We also have the technologies and expertise to resolve any issues our analysis uncovers.

With a highly capable machine shop, electrical engineering services, pump and gearbox repair center, a UL listed control panel shop and a motor shop equipped with a 1000 hp dynamometer, we can handle virtually any maintenance related need you may have.

To find out more about the program or to schedule a consulting visit call our offices at 479-474-5271 or use our toll free number at 800-755-5571.
